

Oil Filter Adapters

PN 1090 Oil Filter Adapter

Oil filter adapters with an integrated oil regulator. Designed for large filter applications, these lightweight adapters feature an oil temperature sender inlet, a spring oiler outlet, and a large cavity to maximize oil flow.

Contour machined from aircraft quality aluminum and anodized for a strong but lightweight unit. Bolt holes are conveniently located on the adapter to allow for ease in mounting. Fully assembled at the factory and available in two styles, straight and 90-degree, to fit your application

Steel threaded adapters are available in coarse and fine thread.

PN 1100 Oil Filter Adapter

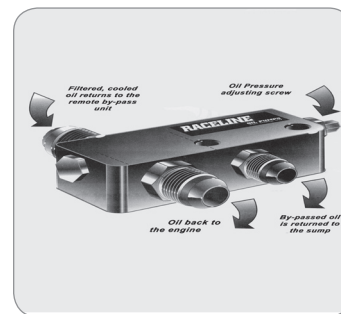

12-16 Thread Adapter - Coarse
16-16 Thread Adapter - Fine

Power Flo™ Bypass

PN 1001-10 Power Flo™ Bypass -10 Fittings

PN 1001-12 Power Flo™ Bypass -12 Fittings

The Internal bypass mechanism utilized in Raceline's dry sump pumps has been incorporated into a remote bypass unit. To obtain lower oil temperatures and control of your oil pressure, simply disable the stock bypass and install a Power Flo™ Remote Bypass unit in the pressure line, after the cooler and filter.
